

ONBOARD SOLAR FIXED PRICE SYSTEMS

We have four ranges of fixed price fully installed working solar systems, all sharing the same three point formula we have use

- Systems have all components, panels, brackets, cables, controllers and all other sundry items that make up a working system. All systems use our popular tilting bracket system enabling them to be installed down the centre of the roof unaffected by roof vents
- Systems are fixed price and quoted on our web site
- Installation is included in the price, we come to your boat wherever your location may be

PERLIGHT/VICTRON SYSTEMS

We offer two systems based on 4 & 6 panel Perlight 300W (1200W or 1800W) panels for a higher output. This system will fit on narrowboats but the panels will occupy the entire roof width. Thus this system is really designed as an excellent value system for wide beams requiring a decent solar output over 4 or 6 panels. These systems are fitted with tilting brackets but can be changed for magnetic feet at an extra cost.

PRICES

4 Panel Systems 1200W

£2,060

6 Panel Systems 1800W

£2,600
